

BLESSINGS AND GOOD WISHES FOR THE COURSE

I am very pleased to learn that Photographic Society of Murshidabad (PSM) in collaboration with Photographic Association of Dum Dum is going to organise a “Certificate Course on Photography”.

Photography has been one of the most celebrated forms of art. Photography teaches people to appreciate the environment and nature and realize the beauty of even the simplest thing around such as a butterfly enjoying its newly harvested nectar in a flower resting on a fertile land.

It can also help you to be aware of what is happening in your environment and in the society. Photography also keeps you from thinking in a boxed manner. You will be able to see how some sort of system works. Photography will also allow you to be more creative in finding views and angles that would make something look as pleasing as possible. You would learn that there is really nothing ugly that can be found in nature.

You will be able to learn how to transform a scratch from something one would really treasure. Learning about this form of art can give you a lot of opportunities in the future. Unlike many popular career paths, the need for a photographer is one that will surely be always around. Photography would let you learn things about yourselves, what things are fascinating to you and what things appear not that enjoyable.

Lastly, photography can help in developing your well-being you will be able to meet people who will teach you to interact with others and most importantly, you will be able to see how beautiful the people you get to meet and the world you are living into are.

I wish all the students an enjoyable course.

BIKAS C SANYAL, Ph.D., D.Sc.(Hon.)

Chevalier de la Légion d'Honneur (France), Pravasi Bharatiya Samman Awardee (India)

Former Advisor to UNESCO & Director of Maison de l'Inde
